Re: 99P-1340/CP 1
Petition to have Eternity eau de parfum Misbranded

Dear Sir or Madam,

I am writing to support the above mentioned petition to have Calvin Klein's Eternity declared misbranded. Eternity contains toxic ingredients and ingredients whose safety has not been substantiated. I am concerned about assumed safety of perfumes that the public unknowingly wears on a daily basis. There are no warning labels on these products and consumers are at risk for toxic exposure to the many chemicals contained in perfumes. These products are especially risky for people with chemical sensitivities, asthma, chronic fatigue syndrome, environmental illness, and children in general. Please take immediate action to correct this safety risk to the public.

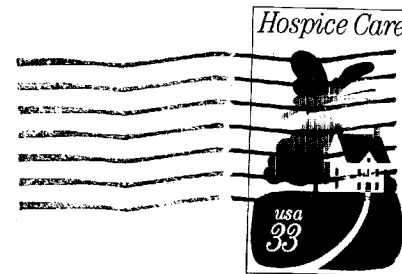

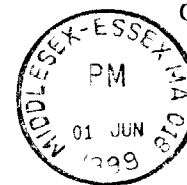

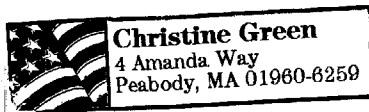

Sincerely,

Christine M. Green

99P-1340
